# PROGRAM

---

The continuous development of digital services and improvement of business processes in the banking sector, with an active role of the state and a constant view of clients, are some of the topics of our spring online conference – “Real but Digital”.

This time, from the point of view of both the state and the banks, we will discuss new services and the development agenda that the banks, together with the National Bank of Serbia and the eGovernment, will be implementing in the coming period.

Those interested will have the opportunity to learn first-hand details about electronic bills of exchange and electronic assets from prominent NBS representatives.

In addition to the presentations, the panel discussion will cover the new service offered by the banks and eGovernment - My Data for My Bank, as well as some other services that are currently being prepared.

As is tradition by now, interesting guests from the country and abroad will present some of their software solutions that we think deserve attention.

We invite you to join us at the online conference “Real but Digital” - on 10-11 June from 11:00 to 13:45.
